

# ASTM Bulletins—1948

## Subject Index Papers, Reports, and Articles

### A

#### Abrasion Test

Report of the A.S.T.M. Task Group Studying the Wyzenbeek Precision Wear Test Meter—Seaman J. Tanenhaus and Gerald Winston. No. 154, October, p. 74 (TP232).

#### Adhesion

Some Factors Affecting Adhesive Bond Formation—H. P. Meissner and E. W. Merrill. No. 151, March, p. 80 (TP88).

Some Fundamental of Glass Adhesion—Frank Moser. No. 150, January, p. 51 (TP23).

Theories of Adhesion as Applied to the Adhesive Properties of High Polymers—Charles J. Seiler and A. D. McLaren. No. 155, December, p. 50 (TP 258).

#### Aggregates

Effect of Drying Time on Results of Magnesium Sulfate Soundness Tests—D. W. Bloem. No. 152, May, p. 76 (TP128); Discussion, No. 153, August, p. 81 (TP173).

#### Air Content

Determination of the Air Content of Motors by the Pressure Method—Thomas G. Taylor, No. 155, December, p. 44 (TP252).

#### Alloys, Non-Ferrous

A.S.T.M. Code Systems for Aluminum Alloys and Magnesium Alloys—R. B. Smith. No. 151, March, p. 50 (TP58).

Change in Hardness of a Metal Bar Under Low Cycles of Reversed and Pulsating Plastic Bending—Harry Majors, Jr. No. 155, December, p. 39 (TP247).

What's in an Alloy?—John C. Kiszka. No. 151, March, p. 51 (TP59).

#### Aluminum

A.S.T.M. Code Systems for Aluminum Alloys and Magnesium Alloys—R. B. Smith. No. 151, March, p. 50 (TP58).

Metals and Plastics—Robert G. Chollar. No. 152, May, p. 80 (TP132); Discussion, p. 87 (TP139).

What's in an Alloy?—John C. Kiszka. No. 151, March, p. 51 (TP59).

#### Annual Address by President

If Doctor Marburg Came Back Today—T. A. Boyd. No. 153, August, p. 55 (TP147).

#### Annual Meeting Program

Provisional Program No. 152, May, p. 17

#### Antifreeze

Requirements of an Engine Antifreeze and Methods of Evaluation—D. H. Green, J. C. Kratzer, and P. I. Emch. No. 154, October, p. 57 (TP215); Discussion, p. 65 (TP223).

#### Appearance

New Committee on Appearance. No. 153, August, p. 35.

#### Automotive Glazing

Automotive Glazing with Plastics—George B. Watkins and Joseph D. Ryan. No. 153, August, p. 65 (TP157).

#### Aviation Gasoline

Better Lead Scavenging Needed for Aviation Gasoline—E. A. Droege-muel-ler. No. 154, October, p. 53 (TP211).

### B

#### Bird Film Applicator

Mechanical Operation of the Bird Film Applicator—A. E. Jacobsen and H. S. Jensen. No. 151, March, p. 95 (TP103).

The Preparation of Uniform Films and Their Dependence on the Irregularities of the Base Surface—Stig Johanson. No. 155, December, p. 53 (TP261).

#### Board of Directors

Personnel of Board of Directors. No. 153, August, p. 39.

#### Brittleness

An Improved Low-Temperature Brittleness Test—E. F. Smith and G. J. Dienes, No. 154, October, p. 46 (TP204); Discussion, p. 49 (TP207).

#### Building Funds

Committees Making Substantial Contributions to Building Fund. No. 153, August, p. 30.

### C

#### Calibrating Extensometers

Dynamic Calibration Method Uses Modified Proving Ring—R. C. A. Thurston. No. 154, October, p. 50 (TP208).

Method of Calibrating Extensometers—W. C. Aber and F. M. Howell. No. 155, December, p. 33 (TP241); Discussion, p. 35 (TP243).

#### Calorimeter

A Versatile Calorimeter for Specific Heat Determinations—Harry Hill and Raymond M. Bell. No. 151, March, p. 88 (TP96).

#### Cathode Nickel

Papers on Cathode Nickel (Abstracts). No. 152, May, p. 37.

#### Carloading Methods

The Use of Test Track in Developing Good Packaging Methods and Carloading Methods—A. N. Perry. No. 155, December, p. 38 (TP246).

#### Cement

New Type Weighted Needles for Determining the Setting Time of Magnesium Oxide Cements—Harry E. Chisholm. No. 154, October, p. 37 (TP195); Discussion, p. 39 (TP197).

Recent Development in Portland Cement (With a Thumbnail Sketch of the Industry)—J. F. Barton. No. 150, January, p. 18.

#### Chemical Analysis

Organic Reagents for Metal Analysis Covered in Washington Symposium. No. 151, March, p. 31.

#### Chromic Acid

The Action of "Chromic Acid" on Zinc Coatings—D. J. Swaine. No. 154, October, p. 52 (TP210).

#### Coatings

A Method for the Routine Determination of Dry Hiding Power of White Paints—F. C. Schmutz and J. M. Gallagher. No. 153, August, p. 77 (TP169).

Measurement of Transparency of Surface Coatings—J. Gross, R. H. Kienle, L. A. Melsheimer, and E. I. Stearns. No. 153, August, p. 73 (TP165).

#### Color Index

Photoelectric Measurement of a Color Index of Liquid Petroleum Products—Louis Lykken. No. 154, October, p. 68 (TP226).

#### Consistency

A Worker-Consistometer for Lubricating Greases—S. A. McKee and H. S. White. No. 153, August, p. 90 (TP182); Discussion, p. 97 (TP189).

The Light-Weight Cone for Penetration of Soft Greases—Prepared by L. C. Brunstrum. No. 154, October, p. 66 (TP224).

#### Consistometer

A Worker-Consistometer for Lubricating Greases—S. A. McKee and H. S. White. No. 153, August, p. 90 (TP182).

#### Copper

Change in Hardness of a Metal Bar Under Low Cycles of Reversed and Pulsating Plastic Bending—Harry Majors, Jr. No. 155, December, p. 39 (TP247).

Quantitative Evaluation of Corrosive Conditions—W. F. Bonwitt and I. Eisen. No. 151, March, p. 84 (TP92); Discussion, No. 154, October, p. 44 (TP202).

What's in an Alloy?—John C. Kiszka. No. 151, March, p. 51 (TP59).

#### Corrosion

A Visual Rating System for Rusted Steel Specimens—Harry L. Faigen. No. 154, October, p. 39 (TP197).

Quantitative Evaluation of Corrosive Conditions—W. F. Bonwitt and I. Eisen. No. 151, March, p. 84 (TP92); Discussion, No. 154, October, p. 44 (TP202).

Requirements of an Engine Antifreeze and Methods of Evaluation—D. H. Green, J. C. Kratzer, P. I. Emch. No. 154, October, p. 57 (TP215); Discussion, p. 57 (TP215).

The Action of "Chromic Acid" on Zinc Coatings—D. J. Swaine. No. 154, October, p. 52 (TP210).

#### Corrugated Paper

Load Concentration in Corrugated Paper—J. H. Toulouse and P. J. Barcus. No. 152, May, p. 77 (TP129).

#### CR-39

Automotive Glazing with Plastics—George B. Watkins and Joseph D. Ryan. No. 153, August, p. 65 (TP157).

#### Cutting Fluids

Symposium on Cutting Oils: No. 151, March

Water-Mixed Cutting Fluids—William H. Oldacre, p. 45 (TP53)

Cutting Fluids—E. H. Reehl, p. 47 (TP55)

Correlation of Laboratory Tests of Cutting Fluids with Field Tests—D. J. Wangelin, p. 48 (TP56)

### D

#### Density

An Instrument for Determining the Volume and Bulk Density of Granular Materials—William E. Gross and John C. Goshorn. No. 151, March, p. 55 (TP63).

#### District Activities

A.S.T.M. District Areas Defined. No. 152, May, p. 45.

District Officers and Personnel. No. 153, August, p. 32.

New A.S.T.M. District Centering in Washington, D. C. No. 150, January, p. 11.

New Ohio Valley District Organizes—Meeting in Dayton on Research. No. 151, March, p. 20.

New Washington (D. C.) District Officers Elected. No. 151, March, p. 19.

### Drain Tile

Committee on Drain Tile Amalgamated in Committee C-15. No. 152, May, p. 35

### Dynamic Calibration

Dynamic Calibration Method Uses Modified Proving Ring—R. C. A. Thurston. No. 154, October, p. 50 (TP208).

## E

### Elastomers

An Improved Low-Temperature Brittleness Test—E. F. Smith and G. J. Dienes. No. 154, October, p. 46 (TP204); Discussion, p. 49 (TP207).

### Electrical Conduction

Measurement of Volume Resistivity of Electrically Conducting Rubber-Like Material—R. F. Miller. No. 151, March, p. 91 (TP99).

### Electrical Properties

Electrical Properties of Plastics—A. J. Warner. No. 153, August, p. 60 (TP152).

### Electric Strain Gage

Measurement and Elimination of Inertia Effects in Textile Testing Equipment by Means of Electric Strain Gages—Herbert F. Schiefer. No. 150, January, p. 43 (TP15).

### Engine Antifreeze

Requirements of an Engine Antifreeze and Methods of Evaluation—D. H. Green, J. C. Kratzer, P. I. Emch. No. 154, October, p. 57 (TP215); Discussion, p. 65 (TP223).

### Exhibit

Extensive Technical Program, Committee Meetings, Exhibits, Features of 51st Annual Meeting. No. 152, May, p. 5. Members Will Find Much of Interest in Exhibits. No. 152, May, p. 11.

Technical Sessions, Committee Meetings, Exhibits, Promise Busiest Annual Meeting. No. 151, March, p. 5.

Testing Equipment and Apparatus on Display in Eighth Apparatus Exhibit; Many New Instruments Shown. No. 153, August, p. 17.

### Extensometers

Method of Calibrating Extensometers—W. C. Aber and F. M. Howell. No. 155, December, p. 33 (TP241); Discussion, p. 35 (TP243).

## F

### Fatigue Testing

Dynamic Calibration Method Uses Modified Proving Ring—R. C. A. Thurston. No. 154, October, p. 50 (TP208).

Effect of Fatigue on Tension-Impact Resistance—William H. Hoppmann II. No. 155, December, p. 36 (TP244); Discussion, p. 38 (TP246).

Symbols and Nomenclature for Fatigue Testing. No. 153, August, p. 36.

### Finances

Financial Highlights—1947. No. 151, March, p. 17.

### Firebrick

A Versatile Calorimeter for Specific Heat Determinations—Harry Hill and Raymond M. Bell. No. 151, March, p. 88 (TP96).

### Flammability

Symposium on Flammability: No. 150, January

Flammability of Textiles for Garment Purposes—Frederic Bonnet, p. 29 (TP1).

Flameproofing in Theory and Practice—R. W. Little, p. 34 (TP6).

The Retailer's Viewpoint on the Flammability of Textiles—Charles W. Dorn, p. 36 (TP8).

### Flow

The Use of the Rossi-Peakes Flow Tester in Measuring the Apparent Viscosity of Plastics at Temperatures from 115 to 175°C.—F. E. Piech and W. E. Gloor. No. 151, March, p. 70 (TP78).

### Fungus

Fungus Resistance of Treated Vegetable Fiber Gaskets—Sigmund Berk. No. 150, January, p. 46 (TP18).

The Effect of Fungi and Humidity on Plastics—John Leutritz, Jr. No. 152, May, p. 88 (TP140).

## G

### Galvanized Sheet and Wire

The Action of "Chromic Acid" on Zinc Coatings—D. J. Swaine. No. 154, October, p. 52 (TP210).

### Gas Masks

An Instrument for Determining the Volume and Bulk Density of Granular Materials—William E. Gross and John C. Goshorn. No. 151, March, p. 55 (TP63).

### Gaskets

Fungus Resistance of Treated Vegetable Fiber Gaskets—Sigmund Berk. No. 150, January, p. 46 (TP18).

### Gasoline

Better Lead Scavenging Needed for Aviation Gasoline—E. A. Droegemueller. No. 153, October, p. 53 (TP211).

Induction Period Calculator—E. L. Korb. No. 153, August, p. 99 (TP191).

### Glass

The Preparation of Uniform Films and Their Dependence on the Irregularities of the Base Surface—Stig Johanson. No. 155, December, p. 53 (TP261).

A Versatile Calorimeter for Specific Heat Determinations—Harry Hill and Raymond M. Bell. No. 151, March, p. 88 (TP96).

Automotive Glazing with Plastics—George B. Watkins and Joseph D. Ryan. No. 153, August, p. 65 (TP157).

Some Fundamentals of Glass Adhesion—Frank Moser. No. 150, January, p. 51, (TP23).

### Glazing

Automotive Glazing with Plastics—George B. Watkins and Joseph D. Ryan. No. 153, August, p. 65 (TP157).

### Gloss

Proposed Revised Tentative Method of Test for Specular Gloss of Paint Finishes (D 523-44 T). No. 150, January, p. 75 (TP47).

The Gloss Measurement of Paint Finishes—Richard S. Hunter. No. 150, January, p. 72 (TP44).

### Greases

A Worker-Consistometer for Lubricating Greases—S. A. McKee and H. S. White. No. 153, August, p. 90 (TP182); Discussion, p. 97 (TP189).

The Light-Weight Cone for Penetration of Soft Greases—L. C. Brunstrum. No. 154, October, p. 66 (TP224).

## H

### Hardness Testing

Change in Hardness of a Metal Bar Under Low Cycles of Reversed and Pulsating Plastic Bending—Harry Majors, Jr. No. 155, December, p. 39 (TP247).

A Means of Determining the Hardness of Wood and Modified Woods Over a Broad Specific Gravity Range—Richard C. Weatherwax, E. C. O. Erickson, and Alfred J. Stamm. No. 153, August, p. 84 (TP176).

### Heat Determination

A Versatile Calorimeter for Specific Heat Determinations—Harry Hill and Raymond M. Bell. No. 151, March, p. 88 (TP96).

### Heat Distortion

A New Interpretation of Heat Distortion Data of Plastics—L. S. Moody and K. B. Goldblum. No. 150, January, p. 55 (TP27).

### Hiding Power

A Method for the Routine Determination of Dry Hiding Power of White Paints—F. C. Schmutz and J. M. Gallagher. No. 153, August, p. 77 (TP169).

### High-Speed Radiography

Frankford Arsenal Experience with High-Speed Radiography—E. R. Thilo. No. 150, January, p. 69 (TP41).

One-Millionth Second Radiography and Its Development—Charles M. Slack and Louis F. Ehrke. No. 150, January, p. 59 (TP31).

### Honorary Memberships

Three Honorary Memberships Awarded. No. 153, August, p. 16.

### Humidity

The Effect of Fungi and Humidity on Plastic—John Leutritz, Jr. No. 152, May, p. 88 (TP140).

## I

### Ignition Temperature

Discussion of Paper on the Ignition Temperature of Rigid Plastics. No. 151, March, p. 66, (TP74).

### Impact Testing

Discussion of Paper on the Resistance to Impact Loading of Plastics. No. 153, August, p. 59 (TP151); No. 154, October, p. 45 (TP203).

Effect of Fatigue on Tension-Impact Resistance—William H. Hoppmann, II. No. 155, December, p. 36 (TP244); Discussion, p. 38 (TP246).

### Induction Period Calculator

Induction Period Calculator—E. L. Korb. No. 153, August, p. 99 (TP191).

### Industrial Wastes

New Subcommittee on Water-borne Industrial Wastes. No. 153, August, p. 34.

### Industrial Water

Proposed Method for the Sampling of Steam. No. 151, March, p. 34.

### Insulating Material

A Versatile Calorimeter for Specific Heat Determinations—Harry Hill and Raymond M. Bell. No. 151, March, p. 88 (TP96).

### International Soil Congress

Report on International Soil Congress. No. 153, August, p. 37.

## L

### Laminates

Low-Pressure Moldings and Laminates—T. Walter Noble. No. 151, March, p. 77 (TP85).

### Lead Scavenging

Better Lead Scavenging Needed for Aviation Gasoline—E. A. Droegemueller. No. 154, October, p. 53 (TP211).

### Low-Temperature Testing

An Improved Low-Temperature Brittleness Tester—E. F. Smith and G. J. Dienes. No. 154, October, p. 46 (TP204); Discussion, p. 49 (TP207).

### Lubricants

The Thixotropic Characteristics of Lubricating Oil Greases—L. W. McLennan and G. H. Smith. No. 152, May, p. 71 (TP123).

A Worker-Consistometer for Lubricating Greases—S. A. McKee and H. S. White. No. 153, August, p. 90 (TP182); Discussion, p. 97 (TP189).

#### Lucite

Automotive Glazing with Plastics—George B. Watkins and Joseph D. Ryan. No. 153, August, p. 65 (TP157).

### M

#### Magnesium

A.S.T.M. Code Systems for Aluminum Alloys and Magnesium Alloys—R. B. Smith. No. 151, March, p. 50 (TP58). Metals and Plastics—Robert G. Chollar. No. 152, May, p. 80 (TP132); Discussion, p. 87 (TP139).

What's in an Alloy?—John C. Kiszka. No. 151, March, p. 51 (TP59).

#### Magnesium Oxychloride Cements

New Type Weighted Needles for Determining the Setting Time of Magnesium Oxychloride Cements—Harry E. Chisholm. No. 154, October, p. 37 (TP195); Discussion, p. 39 (TP197).

#### Magnesium Sulfate Test

Effect of Drying Time on Results of Magnesium Sulfate Soundness Tests—Delmar L. Bloem. No. 152, May, p. 76 (TP128); Discussion, August, No. 153, p. 81 (TP173).

#### Magnetic Strain Gage

A Stress-Strain Tester for Textiles Employing a Magnetic Strain Gage—J. W. Ballou. No. 150, January, p. 38 (TP10).

#### Meetings

*Boston:*  
Research. No. 153, August, p. 33.

*Chicago:*  
Panel on Value of Specifications in Production. No. 152, May, p. 44.  
"Aluminum." No. 155, December, p. 16.

#### *Cleveland:*

"Aluminum." No. 155, December, p. 16.  
Research. No. 152, May, p. 42.

#### *Dayton:*

Research. No. 151, March, p. 20.

#### *Los Angeles:*

Building Construction. No. 150, January, p. 12.  
Joint A.S.T.M.-S.A.E.-A.S.M.E. Meeting. No. 152, May, p. 41.  
"Smog Testing." No. 155, December, p. 15.

#### *New York:*

Domestic House Heating. No. 155, December, p. 17.

#### *New York:*

Controlled Heating and Superfast Cooking. No. 150, January, p. 12.

Man-Made Crystals for Telephone Uses. No. 151, March, p. 18.

Weather. No. 153, August, p. 33.

#### *Philadelphia:*

"The Five Outstanding Developments in Textiles During the Last Decade." No. 155, December, p. 67.

"Good Design—On Purpose." No. 155, December, p. 16.

"When Metal Breaks." No. 151, March, p. 21.

Petroleum. No. 151, March, p. 21.

"Aluminum." No. 155, December, p. 16.

#### *Pittsburgh:*

"Weather and the Man, Particularly the Technical Man." No. 155, December, p. 15.

Japan Through the Eyes of a Metallurgist. No. 152, May, p. 43.

#### *San Francisco:*

A.S.T.M. Officers at Joint Meeting with A.S.M.E. Members. No. 152, May, p. 42.

First Pacific Coast Meeting of the Society. No. 152, May, p. 30.

Technical Program for 1949 Meeting Being Developed. No. 154, October, p. 16.

#### *St. Louis:*

"Milestones in Metals." No. 155, December, p. 18.

Research. No. 152, May, p. 43.

#### *Washington:*

"The Five Outstanding Developments in Textiles During the Last Decade." No. 155, December, p. 16.

"Aluminum." No. 155, December, p. 16.

Symposium on Organic Reagents for Metal Analysis (Abstracts). No. 151, March, p. 31.

#### *Western New York-Ontario:*

"Materials for Gas Turbines." No. 153, August, p. 33.

Annual Meeting in Atlantic City, Week of June 27, 1949. No. 155, December, p. 7.

A.S.T.M. Spring Meeting. No. 150, January, p. 5.

District Meetings in Dayton, Ohio, and Philadelphia. No. 150, January, p. 11.

Extensive Technical Program, Committee Meetings, Exhibits, Features of 51st Annual Meeting. No. 152, May, p. 5.

Fifty-first Annual Meeting. No. 150, January, p. 6.

Interesting District Meetings Planned for Fall and Winter. No. 154, October, p. 17.

Interesting 1948 Photographic Exhibit. No. 153, August, p. 17.

Much New Work on Standardization and Research in Materials Covered at 1948 Committee Week. No. 151, March, p. 9.

1949 Spring Meeting and Committee Week in Chicago, Week of February 28. No. 155, December, p. 6.

Notable Sessions at 1948 Annual Meeting. No. 153, August, p. 5.

Technical Sessions, Committee Meetings, Exhibits, Promise Busiest Annual Meeting. No. 151, March, p. 5.

Testing Equipment and Apparatus on Display in Eighth Apparatus Exhibit; Many New Instruments Shown. No. 153, August, p. 17.

#### **Mortar**

Determination of the Air Content of Mortars by the Pressure Method—Thomas G. Taylor. No. 155, December, p. 44 (TP252).

Proposed Method for Analyzing Fresh Mortar. No. 154, October, p. 21.

### N

#### **Nickel**

Papers on Cathode Nickel (Abstracts). No. 152, May, p. 37.

What's in an Alloy?—John C. Kiszka. No. 151, March, p. 51 (TP59).

#### **Nomenclature**

A.S.T.M. Code Systems for Aluminum Alloys and Magnesium Alloys—R. B. Smith. No. 151, March, p. 50 (TP58).

Symbols and Nomenclature for Fatigue Testing. No. 153, August, p. 36.

#### **Nominating Committee**

1948 Nominating Committee. No. 150, January, p. 10.

1949 Nominating Committee. No. 155, December, p. 12.

#### **Nondestructive Testing**

Scope of Committee E-7 to Cover Nondestructive Testing. No. 155, December, p. 24.

### O

#### **Oil**

Symposium on Cutting Oils: No. 151, March

Water-Mixed Cutting Fluids—William H. Oldacre, p. 45 (TP53).

Cutting Fluids—E. H. Reehl, p. 47 (TP55).

Correlation of Laboratory Tests of Cutting Fluids with Field Tests—D. J. Wangelin, p. 48 (TP56).

Symposium on Service Experience with Inhibited Turbine Oils: No. 152, May.

An Evaluation of Inhibited Turbine Oils Versus Uninhibited Turbine Oils for Turbine Lubrication—M. D. Baker, p. 59 (TP111).

Service Experience with Turbine Oils—C. L. Pope and O. V. Sprague, p. 62 (TP114).

The Care of the Lubricant and Maintenance of the Lubricating System for Central Station Turbine Equipment—E. F. Walsh, p. 64 P (TP116).

Steam Turbines and Their Lubrication—C. D. Wilson, p. 66 (TP118).

The Thixotropic Characteristics of Lubricating Oil Greases—L. W. McLennan and G. H. Smith. No. 152, May, p. 71 (TP123).

**Optical Materials**

Plastics as Optical Materials—H. R. Moulton. No. 151, March, p. 75 (TP83).

**Organic Reagents**

Organic Reagents for Metal Analysis Covered in Washington Symposium. No. 151, March, p. 31.

**Oxidation Stability**

Induction Period Calculator—E. L. Korb. No. 153, August, p. 99 (TP191).

**Oxychloride Cements**

New Type Weighted Needles for Determining the Setting Time of Magnesium Oxychloride Cements—Harry E. Chisholm. No. 154, October, p. 37 (TP195); Discussion, p. 39 (TP197).

### P

#### **Packaging**

The Use of Test Track in Developing Good Packaging and Carloading Methods—A. N. Perry. No. 155, December, p. 38 (TP246).

#### **Paint**

The Gloss Measurement of Paint Finishes—Richard S. Hunter. No. 150, January, p. 72 (TP44).

Measurement of Transparency of Surface Coatings—J. Gross, R. H. Kienle, L. A. Melsheimer, and E. I. Stearns. No. 153, August, p. 73 (TP165).

Mechanical Operation of the Bird Film Applicator—A. E. Jacobsen and H. S. Jensen. No. 151, March, p. 95 (TP103).

A Method for the Routine Determination of Dry Hiding Power of White Paints—F. C. Schmutz and J. M. Gallagher. No. 153, August, p. 77 (TP169).

Paint—Servant of Industry (condensed version)—W. H. Lutz. No. 150, January, p. 14.

The Preparation of Uniform Films and Their Dependence on the Irregularities of the Base Surface—Stig Johanson. No. 155, December, p. 53 (TP261).

Proposed Revised Tentative Method of Test for Specular Gloss of Paint Finishes (D 523-44 T). No. 150, January, p. 75 (TP47).

Report on the Evaluation of Surface Treatment of Steel Prior to Painting—Prepared by Arnold J. Eickhoff. No. 150, January, p. 77 (TP49).

## Paper

Load Concentration in Corrugated Paper—J. H. Toulouse and P. J. Barcus. No. 152, May, p. 77 (TP129).

## Penetration Cone

The Light-Weight Cone for Penetration of Soft Greases—L. C. Brunstrum. No. 154, October, p. 66 (TP224).

## Petroleum Products

see also Gasoline, Greases, Lubricants.  
Photoelectric Measurement of a Color Index of Liquid Petroleum Products—Louis Lykken. No. 154, October, p. 68 (TP226).

## Photoelectric Measurement

Photoelectric Measurement of a Color Index of Liquid Petroleum Products—Louis Lykken. No. 154, October, p. 68 (TP226).

## Photographic Exhibit

Interesting 1948 Photographic Exhibit. No. 153, August, p. 17.

## Plastics

Automotive Glazing with Plastics—George B. Watkins and Joseph D. Ryan. No. 153, August, p. 65 (TP157).

Discussion of Paper on the Ignition Temperature of Rigid Plastics. No. 151, March, p. 66 (TP74).

Discussion of Paper on the Resistance to Impact Loading of Plastics. No. 153, August, p. 59 (TP151); No. 154, October, p. 45 (TP203).

The Effect of Fungi and Humidity on Plastics—John Leutritz, Jr. No. 152, May, p. 88 (TP140).

Electrical Properties of Plastics—A. J. Warner. No. 153, August, p. 60 (TP152).

An Improved Low-Temperature Brittleness Test—E. F. Smith and G. J. Dienes. No. 154, October, p. 46 (TP204); Discussion, p. 49 (TP207).

Low-Pressure Moldings and Laminates—T. Walter Noble. No. 151, March, p. 77 (TP85).

The Mechanism of Plasticization in Plastics—J. Kenneth Craver. No. 152, May, p. 90 (TP142); Discussion, p. 92 (TP144).

Metals and Plastics—Robert G. Chollar. No. 152, May, p. 80 (TP132); Discussion, p. 87 (TP139).

A New Interpretation of Heat Distortion Data of Plastics—L. S. Moody and K. B. Goldblum. No. 150, January, p. 55 (TP27).

Plastics as Optical Materials—H. R. Moulton. No. 151, March, p. 75 (TP83).

Research Problems in Plastics Requiring Investigation. No. 150, January, p. 13.

Tensile Stress-Strain Relationships of Laminated Plastics for Small Strains—J. J. Lamb and B. M. Axilrod. No. 151, March, p. 59 (TP67).

The Use of the Rossi-Peakes Flow Tester in Measuring the Apparent Viscosity of Plastics at Temperatures from 115 to 175 C.—F. E. Piech and W. E. Gloor. No. 151, March, p. 70 (TP78).

## Plexiglas

Automotive Glazing with Plastics—George B. Watkins and Joseph D. Ryan. No. 153, August, p. 65 (TP157).

## Polish

Discussion of Paper on Measurement of Metal Polish Performance. No. 150, January, p. 49 (TP21).

## Polymers

Theories of Adhesion as Applied to the Adhesive Properties of High Polymers.—Charles J. Seiler and A. D. McLaren. No. 155, December, p. 50 (TP258).

## President's Address and Talks

If Doctor Marburg Came Back Today—T. A. Boyd. No. 153, August, p. 55 (TP147).

President Templin Speaks at Several District Meetings. No. 155, December, p. 7.

Research—Everybody's Doing It Now—T. A. Boyd. No. 152, May, p. 53 (TP105).

## Pressure Method

Determination of the Air Content of Mortars by the Pressure Method—Thomas G. Taylor. No. 155, December, p. 44 (TP252).

## Program, Annual Meeting

Provisional Program. No. 152, May, p. 17.

## Protective Coatings

Measurement of Transparency of Surface Coatings—J. Gross, R. H. Kienle, L. A. Melsheimer, and E. I. Stearns. No. 153, August, p. 73 (TP165).

## Proving Ring

Dynamic Calibration Method Uses Modified Proving Ring—R. C. A. Thurston. No. 154, October, p. 50 (TP208).

## Publication Schedule

Publication Schedule for 1948-1949. No. 153, August, p. 22.

## R

## Radiography

Frankford Arsenal Experience with High-Speed Radiography—E. R. Thilo. No. 150, January, p. 69 (TP41).

An Investigation of Radiography in the Range from 0.5 to 2.5 Volts—W. W. Buechner, R. J. Van de Graaff, H. Feshbach, E. A. Burrill, A. Sperduto, and L. R. McIntosh. No. 155, December, p. 54 (TP262).

One-Millionth Second Radiography and Its Development—Charles M. Slack and Louis F. Ehrke. No. 150, January, p. 59 (TP31).

## Research

Research—Everybody's Doing It Now—T. A. Boyd. No. 152, May, p. 53 (TP105).

## Rockwell Hardness

See Hardness Testing.

## Rossi-Peakes Flow Tester

The Use of the Rossi-Peakes Flow Tester in Measuring the Apparent Viscosity of Plastics at Temperatures from 115 to 175 C.—F. E. Piech and W. E. Gloor. No. 151, March, p. 70 (TP78).

## Rubber-Like Material

Measurement of Volume Resistivity of Electrically Conducting Rubber-Like Material—R. F. Miller. No. 151, March, p. 91 (TP99).

## Rust

A Visual Rating System for Rusted Steel Specimens—Harry L. Faigen. No. 154, October, p. 39 (TP197).

## S

## Sampling of Steam

Proposed Method for the Sampling of Steam. No. 151, March, p. 34.

## Sand

Effect of Drying Time on Results of Magnesium Sulfate Soundness Tests—Delmar L. Bloem. No. 152, May, p. 76 (TP128); Discussion, No. 153, August, p. 81 (TP173).

## Sandwich Construction

New Technical Committee on Structural Sandwich Constructions (C-19) Organizes. No. 153, August, p. 35.

## Scavenging Agent

Better Lead Scavenging Needed for Aviation Gasoline—E. A. Droegemueler. No. 154, October, p. 53 (TP211).

## Schools

Many Schools and Faculty Members are Members of A.S.T.M. No. 155, December, p. 7.

## Service Experience

Symposium on Service Experience with Inhibited Turbine Oils. No. 152, May.

An Evaluation of Inhibited Turbine Oils Versus Uninhibited Turbine Oils for Turbine Lubrication—M. D. Baker. p. 59 (TP111).

Service Experience with Turbine Oils—C. L. Pope and O. V. Sprague, p. 62 (TP114).

The Care of the Lubricant and Maintenance of the Lubricating System for Central Station Turbine Equipment—E. F. Walsh, p. 64 (TP116).

Steam Turbines and Their Lubrication—C. D. Wilson, p. 66 (TP118).

## Service Wearing Tests

Service Wearing Tests—E. N. Ditton. No. 152, May, p. 93 (TP145).

## Setting Time

New Type Weighted Needles for Determining the Setting Time of Magnesium Oxychloride Cement—Harry E. Chisholm. No. 154, October, p. 37 (TP195); Discussion, p. 39 (TP197).

## Shipping Materials

Loading Concentration on Corrugated Paper—J. H. Toulouse and P. J. Barcus. No. 152, May, p. 77 (TP129).

## Simulated Service Testing

The Use of Test Track in Developing Good Packaging and Carloading Methods—A. N. Perry. No. 155, December, p. 38 (TP246).

## Soundness Tests

Effect of Drying Time on Results of Magnesium Sulfate Soundness Tests—Delmar L. Bloem. No. 152, May, p. 76 (TP128); Discussion, No. 153, August, p. 81 (TP173).

## Specific Gravity

A Means of Determining the Hardness of Wood and Modified Woods Over a Broad Specific Gravity Range—Richard C. Weatherwax, E. C. O. Erickson, and Alfred J. Stamm. No. 153, August, p. 84 (TP176).

## Standards and Standardization

Actions on Steel, Rubber, and Other Standards. No. 151, March, p. 13.

A Large Number of Current Standardization Projects in Technical Committees. No. 153, August, p. 25.

List of New and Revised Tentatives with Serial Designations. No. 153, August, p. 21.

New Specifications for Facing Brick. No. 150, January, p. 7.

Numerous Actions on Standards Submitted to Members for Letter Vote. No. 153, August, p. 30.

Several New Specifications and Tests Accepted. No. 154, October, p. 5.

Society Approves Standards on Steel Arc-Welding Electrodes and Plastics. No. 153, August, p. 24.

## Steel

Change in Hardness of a Metal Bar Under Low Cycles of Reversed and Pulsating Plastic Bending—Harry Majors, Jr. No. 155, December, p. 39 (TP247).

Metals and Plastics—Robert G. Chollar. No. 152, May, p. 80 (TP132); Discussion, p. 87 (TP139).

Report on the Evaluation of Surface Treatment of Steel Prior to Painting—Prepared by Arnold J. Eickhoff. No. 150, January, p. 77 (TP49).

A Visual Rating System for Rusted Steel Specimens—Harry L. Faigen. No. 154, October, p. 39 (TP197).

#### Stress-Strain Test

A Stress-Strain Tester for Textiles Employing a Magnetic Strain Gage—J. W. Ballou. No. 150, January, p. 38 (TP10).

#### Surface Coatings

Measurement of Transparency of Surface Coatings—J. Gross, R. H. Kienle, L. A. Melsheimer, and E. I. Stearns. No. 153, August, p. 73 (TP165).

#### Surface Treatment

Report on the Evaluation of Surface Treatment of Steel Prior to Painting—Prepared by Arnold J. Eickhoff. No. 150, January, p. 77 (TP49).

#### Symbols

Symbols and Nomenclature for Fatigue Testing. No. 153, August, p. 36.

#### Synthetic Fibers

Application of Synthetic Fibers, Including Glass, in the Textile Industry—Rene Bouvet. No. 150, January, p. 20.

### T

#### Tension Testing

Effect of Fatigue on Tension-Impact Resistance—William H. Hoppmann II. No. 155, December, p. 36 (TP244); Discussion, p. 38 (TP246).

Tensile Stress-Strain Relationships of Laminated Plastics for Small Strains—J. J. Lamb and B. M. Axilrod. No. 151, March, p. 59 (TP67).

#### Test Track

The Use of Test Track in Developing Good Packaging and Carloading Methods—A. N. Perry. No. 155, December, p. 38 (TP246).

#### Tetraethyl Lead

Better Lead Scavenging Needed for Aviation Gasoline—E. A. Droegemueller. No. 154, October, p. 53 (TP211).

#### Tin

What's in an Alloy?—John C. Kiszka. No. 151, March, p. 51 (TP59).

#### Textiles

Application of Synthetic Fibers, Including Glass, in the Textile Industry—Rene Bouvet. No. 150, January, p. 20.

Measurement and Elimination of Inertia Effects in Textile Testing Equipment by Means of Electric Strain Gages—Herbert F. Schiefer. No. 150, January, p. 43 (TP15).

Report of the A.S.T.M. Task Group Studying the Wyzenbeek Precision Wear Test Meter—Seaman J. Tanenhaus and Gerald Winston. No. 154, October, p. 74 (TP232).

Service Wearing Tests—E. N. Ditton. No. 152, May, p. 93 (TP145).

A Stress-Strain Tester for Textiles Em-

ploying a Magnetic Strain Gage—J. W. Ballou. No. 150, January, p. 38 (TP10).

Symposium on Flammability: No. 150, January

Flammability of Textiles for Garment Purposes—Frederic Bonnet, p. 29 (TP1).

Flameproofing in Theory and Practice—R. W. Little, p. 34 (TP6).

The Retailer's Viewpoint on the Flammability of Textiles—Charles W. Dorn, p. 36 (TP8).

#### Thixotropy

The Thixotropic Characteristics of Lubricating Oil Greases—L. W. McLennan and G. H. Smith. No. 152, May, p. 71 (TP123).

#### Timber

See Wood.

#### Transparency

Measurement of Transparency of Surface Coatings—J. Gross, R. H. Kienle, L. A. Melsheimer, and E. I. Stearns. No. 153, August, p. 73 (TP165).

#### Turbine Oils

Symposium on Service Experience with Inhibited Turbine Oils: No. 152, May.

An Evaluation of Inhibited Turbine Oils Versus Uninhibited Turbine Oils for Turbine Lubrication—M. D. Baker, p. 59 (TP111).

Service Experience with Turbine Oils—C. L. Pope and O. V. Sprague, p. 62 (TP114).

The Care of the Lubricant and Maintenance of the Lubricating System for Central Station Turbine Equipment—E. F. Walsh, p. 64 (TP116).

Steam Turbines and their Lubrication—C. D. Wilson, p. 66 (TP118).

### V

#### Vegetable Fiber Gaskets

Fungus Resistance of Treated Vegetable Fiber Gaskets—Sigmund Berk. No. 150, January, p. 46 (TP18).

#### Viscosity

The Use of the Rossi-Peakes Flow Tester in Measuring the Apparent Viscosity of Plastics at Temperatures from 115 to 175 C.—F. E. Piech and W. E. Gloor. No. 151, March, p. 70 (TP78).

#### Volume Resistivity

An Instrument for Determining the Volume and Bulk Density of Granular Materials—William E. Gross and John C. Goshorn. No. 151, March, p. 55 (TP63).

Measurement of Volume Resistivity of Electrically Conducting Rubber-Like Material—R. F. Miller, No. 151, March, p. 91 (TP99).

### W

#### Water

Proposed Method for the Sampling of Steam. No. 151, March, p. 34.

#### Wear Test

Service Wearing Tests—E. N. Ditton. No. 152, May, p. 93 (TP145).

Report of the A.S.T.M. Task Group Studying the Wyzenbeek Precision Wear Test Meter—Seaman J. Tanenhaus and Gerald Winston. No. 154, October, p. 74 (TP232).

#### Weighted Needles

New Type Weighted Needles for Determining the Setting Time of Magnesium Oxychloride Cements—Harry E. Chisholm. No. 154, October, p. 37 (TP195); Discussion, p. 39 (TP197).

#### Whitewares

Committee C-21 on Whitewares. No. 153, August, p. 35.

#### Windows

Automotive Glazing with Plastics—George B. Watkins and Joseph D. Ryan. No. 153, August, p. 65 (TP157).

#### Windshields

Automotive Glazing with Plastics—George B. Watkins and Joseph D. Ryan. No. 153, August, p. 65 (TP157).

#### Wood

A Means of Determining the Hardness of Wood and Modified Woods Over a Broad Specific Gravity Range—Richard C. Weatherwax, E. C. O. Erickson and Alfred J. Stamm. No. 153, August, p. 84 (TP176).

#### Wyzenbeek Test Meter

Report of the A.S.T.M. Task Group Studying the Wyzenbeek Precision Test Meter—Seaman J. Tanenhaus and Gerald Winston. No. 154, October, p. 74 (TP232).

### X

#### X-ray

See Radiography.

### Z

#### Zinc

The Action of "Chromic Acid" on Zinc Coatings—D. J. Swaine. No. 154, October, p. 52 (TP210).

Change in Hardness of a Metal Bar Under Low Cycles of Reversed and Pulsating Plastic Bending—Harry Majors, Jr. No. 155, December, p. 39 (TP247).

Metals and Plastics—Robert G. Chollar, No. 152, May, p. 80 (TP132); Discussion, p. 87 (TP139).

# Index to Authors of Technical Papers

## 1948 ASTM Bulletins

While the Author Index does not list authors according to alphabetic sequence and the titles of some of the papers are condensed, it is believed the information as presented will be of service. Further details are given in the Subject Index.

### January 1948—No. 150

#### *Symposium on Flammability*

- FREDERIC BONNET—Flammability of Textiles for Garment Purposes  
R. W. LITTLE—Flameproofing in Theory and Practice  
CHARLES W. DORN—The Retailer's Viewpoint on the Flammability of Textiles.  
J. W. BALLOU—A Stress-Strain Tester for Textiles Employing a Magnetic Strain Gage  
HERBERT F. SCHIEFER—Measurement and Elimination of Inertia Effects in Textile Testing Equipment  
SIGMUND BERK—Fungus Resistance of Treated Vegetable Fiber Gaskets  
FRANK MOSER—Some Fundamentals of Glass Adhesion  
L. S. MOODY AND K. B. GOLDBLUM—A New Interpretation of Heat Distortion Data of Plastics  
CHARLES M. SLACK AND LOUIS F. EHRKE—One-Millionth Second Radiography and Its Development  
E. R. THILO—Frankford Arsenal Experience with High-Speed Radiography  
RICHARD S. HUNTER—The Gloss Measurement of Paint Finishes  
ARNOLD J. EICKHOFF—Report on the Evaluation of Surface Treatment of Steel Prior to Painting

### March 1948—No. 151

#### *Symposium on Cutting Oils*

- WILLIAM H. OLDACRE—Water-Mixed Cutting Fluids  
E. A. REEHL—Cutting Fluids  
D. L. WANGELIN—Correlation of Laboratory Testing of Cutting Fluids with Field Tests  
R. B. SMITH—A.S.T.M. Code Systems for Aluminum Alloys and Magnesium Alloys  
J. C. KISZKA—What's in an Alloy?  
WILLIAM E. GROSS AND JOHN C. GOSHORN—An Instrument for Determining the Volume and Bulk Density of Granular Materials  
J. J. LAMB AND B. M. AXILROD—Tensile Stress-Strain Relationships of Laminated Plastics for Small Strains  
N. P. SETCHKIN—Discussion of a paper on "Ignition Temperature of Rigid Plastics"  
F. E. PIECH AND W. E. GLOOR—The Use of the Rossi-Peakes Flow Tester in Measuring the Apparent Viscosity of Plastics  
H. R. MOULTON—Plastics as Optical Materials  
T. WALTER NOBLE—Low-Pressure Moldings and Laminates  
H. P. MEISSNER AND E. W. MERRILL—Some Factors Affecting Adhesive Bond Formation  
W. F. BONWITT AND I. EISEN—Quantitative Evaluation of Corrosive Conditions  
HARRY HILL AND RAYMOND M. BELL—A Versatile Calorimeter for Specific Heat Determinations  
R. F. MILLER—Measurement of Volume Resistivity of Electrically Conducting Rubber-Like Material  
A. E. JACOBSEN AND H. S. JENSEN—Mechanical Operation of the Bird-Film Applicator

### May 1948—No. 152

#### *T. A. BOYD—Research—Everybody's Doing it Now*

#### *Symposium on Turbine Oils*

- M. D. BAKER—An Evaluation of Inhibited Turbine Oils Versus Uninhibited Turbine Oils for Turbine Lubrication  
C. L. POPE AND D. V. SPRAGUE—Service Experience with Turbine Oils  
ERNEST F. WALSH—The Care of the Lubricant and Maintenance of the Lubricating System for Central Station Turbine Equipment  
C. D. WILSON—Steam Turbines and Their Lubrication

- L. W. McLENNAN AND G. H. SMITH—The Thixotropic Characteristics of Lubricating Oil Greases  
DELMAR L. BLOEM—Effect of Drying Time on Magnesium Sulfate Soundness Tests  
J. H. TOULOUSE AND P. J. BARCUS—Load Concentration in Corrugated Paper  
ROBERT G. CHOLLAR—Metals and Plastics  
JOHN LEUTRITZ, JR.—The Effect of Fungi and Humidity on Plastics  
J. KENNETH CRAVER—The Mechanism of Plasticization in Plastics  
E. N. DITTON—Service Wearing Tests

### August 1948—No. 153

- T. A. BOYD—If Doctor Marburg Came Back Today  
A. J. WARNER—Electrical Properties of Plastics  
GEORGE B. WATKINS AND JOSEPH D. RYAN—Automotive Glazing with Plastics  
J. GROSS, R. H. KIENTLE, L. A. MELSHEIMER, AND E. I. STEARNS—Measurement of Transparency of Surface Coatings  
F. C. SCHMUTZ AND J. M. GALLAGHER—A Method for the Routine Determination of Dry Hiding Power of White Paints  
RICHARD C. WEATHERWAX, E. C. O. ERICKSON, AND ALFRED J. STAMM—A Means of Determining the Hardness of Wood and Modified Woods Over a Broad Specific Gravity Range  
S. A. McKEE AND H. S. WHITE—A Worker-Consistometer for Lubricating Greases  
E. L. KORB—Induction Period Calculator.

### October 1948—No. 154

- HARRY E. CHISHOLM—New Type Weighted Needles for Determining the Setting Time of Magnesium Oxychloride Cements  
HARRY L. FAIGEN—A Visual Rating System for Rusted Steel Specimens  
E. F. SMITH AND G. J. DIENES—An Improved Low-Temperature Brittleness Test  
R. C. A. THURSTON—Dynamic Calibration Method Uses Modified Proving Ring  
D. J. SWAINE—The Action of "Chromic Acid" on Zinc Coatings  
E. A. DROEGEMUELLER—Better Lead Scavenging Needed for Aviation Gasoline  
D. H. GREEN, J. C. KRATZER, AND P. I. EMCH—Requirements of an Engine Antifreeze and Methods of Evaluation  
L. C. BRUNSTRUM—The Light-Weight Cone for Penetration of Soft Greases  
LOUIS LYKKEN—Photoelectric Measurement of a Color Index of Liquid Petroleum Products  
SEAMAN J. TANENHAUS AND GERALD WINSTON—Report of the A.S.T.M. Task Group Studying the Wyzenbeek Precision Wear Test Meter

### December 1948—No. 155

- W. C. ABER AND F. M. HOWELL—A Method of Calibrating Extensometers  
WILLIAM H. HOPPMANN II—Effect of Fatigue on Tension-Impact Resistance  
A. N. PERRY—The Use of a Test Track in Developing Good Packaging and Carloading Methods  
HARRY MAJORS, JR.—Change in Hardness of a Metal Bar Under Low Cycles of Reversed and Pulsating Plastic Bending  
THOMAS G. TAYLOR—Determination of the Air Content of Mortars by the Pressure Method  
CHARLES J. SEILER AND A. D. McLAREN—Theories of Adhesions as Applied to the Adhesive Properties of High Polymers  
STIG JOHANSON—The Preparation of Uniform Films and Their Dependence on the Irregularities of the Base Surface  
W. W. BUECHNER, R. J. VAN DE GRAFF, H. FESHBACH, E. A. BURRILL, A. SPERDUTO, AND L. R. McINTOSH—An Investigation of Radiography in the Range from 0.5 to 2.5 Million Volts
